This is the sixth chapter of the English Learner Tool Kit, which is intended to help state and local education agencies (SEAs and LEAs) meet their obligations to English Learners (ELs). This tool kit should be read in conjunction with the U.S. Department of Education Office for Civil Rights’ (OCR) and the U.S. Department of Justice’s (DOJ) Dear Colleague Letter on “English Learner Students and Limited English Proficient Parents,” published in January 2015, which outlines SEAs’ and LEAs’ legal obligations to ELs under civil rights laws and other federal requirements. The Dear Colleague Letter can be found at http://www2.ed.gov/about/offices/list/ocr/ellresources.html.

TOOLS AND RESOURCES FOR ADDRESSING ENGLISH LEARNERS WITH DISABILITIES

**KEY POINTS**

- LEAs must identify, locate, and evaluate ELs with disabilities in a timely manner.
- LEAs must consider the English language proficiency of ELs with disabilities in determining appropriate assessments and other evaluation materials.
- LEAs must provide and administer special education evaluations in the child’s native language, unless it is clearly not feasible to do so, to ensure that a student’s language needs can be distinguished from a student’s disability-related needs.
- LEAs must not identify or determine that EL students are students with disabilities because of their limited English language proficiency.
- LEAs must provide EL students with disabilities with both the language assistance and disability-related services they are entitled to under federal law.

The Individuals with Disabilities Education Act (IDEA) and Section 504 of the Rehabilitation Act of 1973 (Section 504) address the rights of students with disabilities in school and other educational settings. If an EL is suspected of having one or more disabilities, the LEA must evaluate the EL promptly to determine if the EL has a disability or disabilities and whether the EL needs disability-related services (which are special education and related services under IDEA or regular or special education and related aids and services under Section 504). Disability evaluations may not be delayed because of a student’s limited English language proficiency (ELP) or the student’s participation in a language instruction educational program (LIEP). Also, a student’s ELP cannot be the basis for determining that a student has a disability.

It is important for educators to accurately determine whether ELs are eligible for disability-related services. Research shows that there is variability in how LEAs...
identify ELs as eligible for special education services; some LEAs over-identify and others under-identify ELs as eligible for special education services when compared to non-ELs (Artiles, Rueda, Salazar, & Higareda, 2005; Zehler et al., 2003). Researchers have identified four potential factors that may contribute to the misidentification of special education needs, and learning disabilities in particular, among students who are ELs: (1) the evaluating professional’s lack of knowledge of second language development and disabilities; (2) poor instructional practices; (3) weak intervention strategies; and (4) inappropriate assessment tools (Sánchez, Parker, Akbayin, & McTigue, 2010).

Appropriate disability identification processes that evaluate the student’s disability-related educational needs and not the student’s English language skills will help school personnel to accurately identify students in need of disability-related services. In addition, LEAs must ensure that a student’s special education evaluation is provided and administered in the student’s native language or other mode of communication and in the form most likely to yield reliable information about what the student knows and can do, unless it is clearly not feasible to do so. Assessing whether a student has a disability in his or her native language or other mode of communication can help educators ascertain whether a need stems from lack of ELP and/or a student’s disability-related educational needs.

Both IDEA and Section 504 require that schools provide a free appropriate public education (FAPE) to eligible or qualified students with disabilities. Under IDEA, FAPE requires, among other things, the provision of special education and related services at no cost to the parents in conformity with an individualized education program (IEP). An IEP is a written document, developed at a meeting of the IEP team that includes the specialized instruction and related services to address the student’s needs that result from the student’s disability. LEAs must develop and implement either an IEP under IDEA, or convene a group of knowledgeable persons to determine what services the student should receive under Section 504, as appropriate. Depending on the individual needs of the student, FAPE under Section 504 could include regular or special education and related aids and services designed to meet the individual educational needs of students with disabilities as adequately as the needs of nondisabled students are met. While Section 504 and IDEA are different statutes, as reflected in ED’s regulations, one way to meet the requirements of Section 504 FAPE is to implement an IEP developed in accordance with IDEA.

When an EL student is determined to be a child with a disability—as defined in IDEA, or an individual with a disability under the broader definition of disability in Section 504—the student’s EL and disability-related educational needs must be met. For EL students, in addition to the required IEP team participants under IDEA, it is essential that the IEP team include participants who have knowledge of the student’s language needs. It is also important that the IEP team include professionals with training, and preferably expertise, in second language acquisition and how to differentiate between the student’s needs stemming from a disability or lack of ELP.

In addition, under IDEA, the LEA must take whatever action is necessary to ensure that the student’s parents understand the proceedings of the IEP team meeting, including arranging for an interpreter for parents with limited English proficiency or parents who are deaf. Under Title VI of the Civil Rights Act of 1964 and the Equal Educational Opportunities Act, for an LEP parent to have meaningful access to an IEP or Section 504 plan meeting, it also may be necessary to have the IEPs, Section 504 plans, or related documents translated into the parent’s primary language. For more information on the separate Title VI obligations of school districts to communicate with LEP parents, see Chapter 10 of the EL Tool Kit.
Should parents decline disability-related services under IDEA and Section 504, the SEA and LEA remain obligated to provide appropriate language assistance services to ELs. If parents opt out of specific EL programs and services, but have consented to the provision of disability-related services, the LEA remains obligated to provide such services as required in the IEP or Section 504 plan, and to conduct ELP monitoring and/or provide language assistance as appropriate. See Chapter 7 of the EL Tool Kit for information on obligations to students who opt out of EL programs and services.

The following checklist is intended to help SEAs and LEAs serve ELs who also have a disability. The checklist provides suggested questions only. LEAs and schools should check their SEA’s policies and procedures and federal regulations and guidance to ensure compliance.

**Identifying Whether an EL Has a Disability**

- When an EL is suspected of having a disability, is the disability evaluation administered within required timelines once required notices have been provided and parental consent has been obtained?
- Is the reason for the disability evaluation based on the student’s suspected disability and need for disability-related services, and not on the student’s ELP?
- Does the evaluation use appropriate methods to measure the student’s abilities and not the student’s English language skills?
- Is the disability evaluation administered in the child’s native language, unless clearly not feasible to do so, to avoid misclassification?
- Can the disability evaluation be conducted in more than one form, such as orally or in writing?
- Did the IEP or Section 504 team gather information from the student, parents, and school records regarding the student’s previous educational experiences, language assessments, and special education assessments?

**Analyzing and Utilizing the Results of the Disability Evaluation**

- Are evaluators trained to conduct the evaluation and interpret the results, including knowing how to differentiate between language needs and a disability?
- Does the IEP or Section 504 team include participants who have knowledge of the student’s language needs and training in special education and related services, and professionals with training in second language acquisition and EL services? Do these participants have the knowledge to recommend an educational program or plan that provides the student with appropriate services and/or supports based on the student’s disability and English language acquisition needs? Do these participants also understand cultural differences that may exist?
- Have the parents been invited to participate in the planning process and informed of their rights, in a language they understand?
- Have a trained interpreter and translated documents been made available for parents with limited English proficiency when required (e.g., parent notices under IDEA), or when determined necessary to ensure effective communication? Is a qualified sign language interpreter available for parents who have hearing loss and need such services?
- Does the LEA’s educational program address the EL’s language needs and include disability-related services designed to address those needs?
- Does the IEP or Section 504 plan outline when and by whom the accommodations, modifications, and supports in the IEP or Section 504 plan will be provided?
- Will the recommended services allow ELs with a disability to be involved and make progress in the general education curriculum and to participate in extracurricular activities?
- Is there a formal plan to monitor the progress of ELs with disabilities with respect to language and disability-based goals?
- Have the student’s general education teachers and related service providers been made aware of the IEP or Section 504 services for the EL?

You can access Tools and Resources for Addressing English Learners with Disabilities at http://www2.ed.gov/about/offices/list/oea/english-learner-toolkit/index.html.
The U.S. Department of Education does not mandate or prescribe particular standards, curricula, lesson plans, assessments, or other instruments in this tool kit. This tool kit contains examples of, adaptations of, and links to resources created and maintained by other public and private organizations. This information is provided for the reader’s convenience and is included here to offer examples of the many resources that educators, parents, advocates, administrators, and other concerned parties may find helpful and use at their discretion. The U.S. Department of Education does not control or guarantee the accuracy, relevance, timeliness, or completeness of this outside information. Further, the inclusion of links to items does not reflect their importance, nor is it intended to endorse any views expressed, or materials provided. All links included here were verified on August 10, 2015.

The following set of tools is intended to help schools, LEAs, and SEAs in appropriately identifying and serving ELs with disabilities. The tools give examples of how schools can refer, assess, and identify ELs who may have a disability; how to write an IEP and select accommodations for ELs with disabilities; and how to compare data about EL students with disabilities from LEA to LEA.

Tool #1, Referral, Identification, Assessment, and Service Delivery to ELs with Disabilities, includes recommendations about ELs with disabilities from states with large or rapidly growing EL student populations.

Tool #2, Considering the Influence of Language Differences and Disability on Learning Behaviors, offers a matrix of learning behaviors organized by skill area (e.g., listening, speaking, reading, etc.) and the varying roles that language difference or disability can play in those behaviors.

Tool #3, Developing an IEP for an English Learner with a Disability, is a list of questions to consider for ELs during the IEP-writing process.

Tool #4, How to Use Data from the Office for Civil Rights’ Civil Rights Data Collection (CRDC), provides instructions about how to access EL data at the LEA level, including data about ELs with disabilities.

Tool #5, Selecting Appropriate Accommodations for Students with Disabilities, offers a list of “dos” and “don’ts” related to choosing accommodations for students with disabilities.

*The list of tools above may not reflect the actual titles of the individual documents/sources.

You can access Tools and Resources for Addressing English Learners with Disabilities at http://www2.ed.gov/about/offices/list/oepla/english-learner-toolkit/index.html.
The EL Tool Kit contains examples of, adaptations of, and links to resources created and maintained by other public and private organizations. This information is provided for the reader's convenience and is included here to offer examples of the many resources that educators, parents, advocates, administrators, and other interested parties may find helpful and use at their discretion. **TOOL #1**
**REFERRAL, IDENTIFICATION, ASSESSMENT, AND SERVICE DELIVERY TO ELs WITH DISABILITIES**

This list of policy recommendations comes from the National Association of State Directors of Special Education as part of a publication dedicated to policies related to ELs with disabilities. For this publication, researchers interviewed SEA staff members from seven states that were selected because they had a large or rapidly growing EL population. The states were Alaska, Arkansas, California, Florida, Kansas, New Mexico, and Texas.

**POLICY RECOMMENDATIONS**

The states that participated in the interviews offered a number of suggestions when asked for policy recommendations pertaining to referral, identification, assessment, and service delivery to ELs with disabilities.

- **Local accountability**—Local planning areas that submit special education program plans to the state should be required to detail their process for the referral, identification, assessment, and service delivery to ELs with disabilities.

- **Clear policies and guidance**—States should create a comprehensive policy for ELs with exceptionalities (including gifted education) based on current research followed by extensive guidance to localities.

- **Teacher training and licensure**—States should facilitate and/or require all teachers to be trained to some extent in ESL [English as a Second Language] strategies and language acquisition. Further, policies should be in place that require any teacher who serves at least one EL to be trained in the appropriate ESL or bilingual education strategies necessary in order to meet the language development as well as academic needs of the students.

- **Coordinated policies between special education and EL professionals**—States should consider developing policies that require and set parameters for communication and collaboration between EL and special education professionals at the point of entry to and exit from special education as well as during the monitoring process while ELs are being served in special education.

You can access **Tools and Resources for Addressing English Learners with Disabilities** at [http://www2.ed.gov/about/offices/list/oea/english-learner-toolkit/index.html](http://www2.ed.gov/about/offices/list/oea/english-learner-toolkit/index.html)
Differentiating language and literacy acquisition from disability can be difficult for some educators. The following table illustrates learning behaviors that a student might exhibit in class, followed by corresponding indicators of whether that behavior could represent a language difficulty or a potential learning disability. By determining the root of each student’s difficulties, educators can select the most appropriate and effective teaching and learning strategies to use.

### COMPARISON OF LANGUAGE DIFFERENCES VERSUS DISABILITIES

This tool is taken from *Meeting the Needs of English Learners with Disabilities: Resource Book* by Jarice Butterfield, Ph. D., Santa Barbara County SELPA, on behalf of the SELPA Administrators of California Association. In the tool below, L1 refers to the student’s native language and L2 refers to the student’s second language (English). It is reprinted with permission of Dr. Butterfield.

**Oral Comprehension/Listening**

<table>
<thead>
<tr>
<th>Learning Behavior Manifested</th>
<th>Indicators of a Language Difference due to 2nd Language Acquisition</th>
<th>Indicators of a Possible Learning Disability</th>
</tr>
</thead>
<tbody>
<tr>
<td>Student does not respond to verbal directions</td>
<td>Student lacks understanding of vocabulary in English but demonstrates understanding in L1</td>
<td>Student consistently demonstrates confusion when given verbal directions in L1 and L2; may be due to processing deficit or low cognition</td>
</tr>
<tr>
<td>Student needs frequent repetition of oral directions and input</td>
<td>Student is able to understand verbal directions in L1 but not L2</td>
<td>Student often forgets directions or needs further explanation in L1 and L2 (home &amp; school); may be due to an auditory memory difficulty or low cognition</td>
</tr>
<tr>
<td>Student delays responses to questions</td>
<td>Student may be translating question in mind before responding in L2; gradual improvement seen over time</td>
<td>Student consistently takes a longer time period to respond in L1 &amp; L2 and it does not change over time; may be due to a processing speed deficit</td>
</tr>
</tbody>
</table>

## TOOL #2: CONSIDERING THE INFLUENCE OF LANGUAGE DIFFERENCES AND DISABILITY ON LEARNING BEHAVIORS (CONTINUED)

### Speaking/Oral Fluency

<table>
<thead>
<tr>
<th>Learning Behavior Manifested</th>
<th>Indicators of a Language Difference due to 2nd Language Acquisition</th>
<th>Indicators of a Possible Learning Disability</th>
</tr>
</thead>
<tbody>
<tr>
<td>Student lacks verbal fluency (pauses, hesitates, omits words)</td>
<td>Student lacks vocabulary, sentence structure, and/or self-confidence</td>
<td>Speech is incomprehensible in L1 and L2; may be due to hearing or speech impairment</td>
</tr>
<tr>
<td>Student is unable to orally retell a story</td>
<td>Student does not comprehend story due to a lack of understanding and background knowledge in English</td>
<td>Student has difficulty retelling a story or event in L1 and L2; may have memory or sequencing deficits</td>
</tr>
<tr>
<td>Student does not orally respond to questions, or does not speak much</td>
<td>Lacks expressive language skills in English; it may be the silent period in 2nd language acquisition</td>
<td>Student speaks little in L1 or L2; student may have a hearing impairment or processing deficit</td>
</tr>
</tbody>
</table>

### Phonemic Awareness/Reading

<table>
<thead>
<tr>
<th>Learning Behavior Manifested</th>
<th>Indicators of a Language Difference due to 2nd Language Acquisition</th>
<th>Indicators of a Possible Learning Disability</th>
</tr>
</thead>
<tbody>
<tr>
<td>Student does not remember letter sounds from one day to the next</td>
<td>Student will initially demonstrate difficulty remembering letter sounds in L2 since they differ from the letter sounds in L1, but with repeated practice over time will make progress</td>
<td>Student doesn't remember letter sounds after initial and follow-up instruction (even if they are common between L1/L2 ); may be due to due a visual/auditory memory deficit or low cognition</td>
</tr>
<tr>
<td>Student is unable to blend letter sounds in order to decode words in reading</td>
<td>The letter sound errors may be related to L1 (for example, L1 may not have long and short vowel sounds); with direct instruction, student will make progress over time</td>
<td>Student makes letter substitutions when decoding not related to L1; student cannot remember vowel sounds; student may be able to decode sounds in isolation, but is unable to blend the sounds to decode whole word; may be due to a processing or memory deficit</td>
</tr>
<tr>
<td>Student is unable to decode words correctly</td>
<td>Sound not in L1, so unable to pronounce word once decoded</td>
<td>Student consistently confuses letters/words that look alike; makes letter reversals, substitutions, etc. that are not related to L1; may be processing or memory deficit</td>
</tr>
</tbody>
</table>

### TOOL #2: CONSIDERING THE INFLUENCE OF LANGUAGE DIFFERENCES AND DISABILITY ON LEARNING BEHAVIORS (CONTINUED)

#### Reading Comprehension and Vocabulary

<table>
<thead>
<tr>
<th>Learning Behavior Manifested</th>
<th>Indicators of a Language Difference due to 2nd Language Acquisition</th>
<th>Indicators of a Possible Learning Disability</th>
</tr>
</thead>
<tbody>
<tr>
<td>Student does not understand passage read, although may be able to read w/ fluency and accuracy</td>
<td>Lacks understanding and background knowledge of topic in L2; is unable to use contextual clues to assist with meaning; improvement seen over time as L2 proficiency increases</td>
<td>Student doesn’t remember or comprehend what was read in L1 or L2 (only applicable if student has received instruction in L1); this does not improve over time; this may be due to a memory or processing deficit</td>
</tr>
<tr>
<td>Does not understand key words/ phrases; poor comprehension</td>
<td>Lacks understanding of vocabulary and meaning in English</td>
<td>The student’s difficulty with comprehension and vocabulary is seen in L1 and L2</td>
</tr>
</tbody>
</table>

#### Writing

<table>
<thead>
<tr>
<th>Learning Behavior Manifested</th>
<th>Indicators of a Language Difference due to 2nd Language Acquisition</th>
<th>Indicators of a Possible Learning Disability</th>
</tr>
</thead>
<tbody>
<tr>
<td>Errors made with punctuation/ capitalization</td>
<td>The error patterns seen are consistent with the punctuation and capitalization rules for L1; student’s work tends to improve with appropriate instruction in English</td>
<td>Student consistently or inconsistently makes capitalization and punctuation errors even after instruction; this may be due to deficits in organization, memory or processing</td>
</tr>
<tr>
<td>Student has difficulty writing grammatically correct sentences</td>
<td>Student’s syntax is reflective of writing patterns in L1; typical error patterns seen in 2nd language learners (verb tense, use of adverbs or adjectives); improves over time</td>
<td>The student makes more random errors such as word omissions, missing punctuation; grammar errors are not correct in L1 or L2; this may be due to a processing or memory deficit</td>
</tr>
<tr>
<td>Student has difficulty generating a paragraph or writing essays but is able to express his or her ideas orally</td>
<td>Student is not yet proficient in writing English even though they may have developed verbal skills; student makes progress over time and error patterns are similar to other 2nd language learners</td>
<td>The student seems to have difficulty paying attention or remembering previously learned information; the student may seem to have motor difficulties and avoids writing; student may have attention or memory deficits</td>
</tr>
</tbody>
</table>

*Continued on next page*
Spelling

<table>
<thead>
<tr>
<th>Learning Behavior Manifested</th>
<th>Indicators of a Language Difference due to 2nd Language Acquisition</th>
<th>Indicators of a Possible Learning Disability</th>
</tr>
</thead>
<tbody>
<tr>
<td>Student misspells words</td>
<td>Student will &quot;borrow&quot; sounds from L1; progress seen over time as L2 proficiency increases</td>
<td>Student makes errors such as writing the correct beginning sound of words and then random letters or correct beginning and ending sounds only; may be due to a visual memory or processing deficit</td>
</tr>
<tr>
<td>Student spells words incorrectly; letters are sequenced incorrectly</td>
<td>Writing of words if reflective of English fluency level or cultural thought patterns; words may align to letter sounds or patterns of L1 (sight words may be spelled phonetically based on L1)</td>
<td>The student makes letter sequencing errors such as letter reversals that are not consistent with L1 spelling patterns; may be due to a processing deficit</td>
</tr>
</tbody>
</table>

Mathematics

<table>
<thead>
<tr>
<th>Learning Behavior Manifested</th>
<th>Indicators of a Language Difference due to 2nd Language Acquisition</th>
<th>Indicators of a Possible Learning Disability</th>
</tr>
</thead>
<tbody>
<tr>
<td>Student manifests difficulty learning math facts and/or math operations</td>
<td>Student lacks comprehension of oral instruction in English; student shows marked improvement with visual input or instructions in L1</td>
<td>Student has difficulty memorizing math facts from one day to the next and requires manipulatives or devices to complete math problems; may have visual memory or processing deficits</td>
</tr>
<tr>
<td>Student has difficulty completing multiple-step math computations</td>
<td>Student lacks comprehension of oral instruction in English; student shows marked improvement with visual input or instructions in L1</td>
<td>Student forgets the steps required to complete problems from one day to the next, even with visual input; student reverses or forgets steps; may be due to a processing or memory deficit</td>
</tr>
<tr>
<td>Student is unable to complete word problems</td>
<td>Student does not understand mathematical terms in L2 due to English reading proficiency; student shows marked improvement in L1 or with visuals</td>
<td>Student does not understand how to process the problem or identify key terms in L1 or L2; may be a processing deficit/reading disability</td>
</tr>
</tbody>
</table>

#### Handwriting

<table>
<thead>
<tr>
<th>Learning Behavior Manifested</th>
<th>Indicators of a Language Difference due to 2nd Language Acquisition</th>
<th>Indicators of a Possible Learning Disability</th>
</tr>
</thead>
<tbody>
<tr>
<td>Student is unable to copy words correctly</td>
<td>Lack of experience with writing the English alphabet</td>
<td>Student demonstrates difficulty copying visual material to include shapes, letters, etc. This may be due to a visual/motor or visual memory deficit</td>
</tr>
</tbody>
</table>

#### Behavior

<table>
<thead>
<tr>
<th>Learning Behavior Manifested</th>
<th>Indicators of a Language Difference due to 2nd Language Acquisition</th>
<th>Indicators of a Possible Learning Disability</th>
</tr>
</thead>
<tbody>
<tr>
<td>Student appears inattentive and/or easily distracted</td>
<td>Student does not understand instructions in English due to level of proficiency</td>
<td>Student is inattentive across environments even when language is comprehensible; may have attention deficits</td>
</tr>
<tr>
<td>Student appears unmotivated and/or angry; may manifest internalizing or externalizing behavior</td>
<td>Student does not understand instruction due to limited English and does not feel successful; student has anger or low self-esteem related to 2nd language acquisition</td>
<td>Student does not understand instruction in L1 or L2 and across contexts; may be frustrated due to a possible learning disability</td>
</tr>
<tr>
<td>Student does not turn in homework</td>
<td>Student may not understand directions or how to complete the homework due to lack of English proficiency; student may not have access to homework support at home</td>
<td>Student seems unable to complete homework consistently even when offered time and assistance with homework during school; this may be due to a memory or processing deficit</td>
</tr>
</tbody>
</table>

**TOOL #3**
DEVELOPING AN IEP FOR AN ENGLISH LEARNER WITH A DISABILITY

The following list of questions is included as part of a National Dissemination Center for Children with Disabilities (NICHCY) training tool on IDEA. It is a tool to assist educators in developing IEPs for an EL student with a disability.

**A CHECKLIST FOR IEP TEAMS: CONSIDERING LIMITED ENGLISH PROFICIENCY—DEVELOPING THE IEP**

In developing an IEP for a student with limited English proficiency, the IEP Team must consider the student’s level of ELP, this includes both second language conversational skills as well as academic language proficiency. Therefore, the IEP Team must consider the student’s level of ELP in listening, speaking, reading and writing, to support and strengthen implementation of the IEP goals. The IEP Team may find it helpful to ask the following framing questions:

<table>
<thead>
<tr>
<th>Framing Questions</th>
<th>Yes</th>
<th>No</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Has the dominant language in the home been considered?</td>
<td></td>
<td></td>
</tr>
<tr>
<td>2. Has the child’s primary language of communication been considered?</td>
<td></td>
<td></td>
</tr>
<tr>
<td>3. Have the cultural values and beliefs of the parents been considered in planning for the child’s education?</td>
<td></td>
<td></td>
</tr>
<tr>
<td>4. Does the instructional plan incorporate a variety of instructional strategies?</td>
<td></td>
<td></td>
</tr>
<tr>
<td>5. Is there a member of the IEP Team who has expertise regarding the student and understands how language develops as well as strategies that can be used when educating a student with English as a second language?</td>
<td></td>
<td></td>
</tr>
<tr>
<td>6. Does the IEP Team have access to assessment data that is accurate and unbiased?</td>
<td></td>
<td></td>
</tr>
<tr>
<td>7. Does the assessment information use a variety of methods and environments?</td>
<td></td>
<td></td>
</tr>
<tr>
<td>8. Does the “present levels” statement in the IEP address both how the student uses his or her native language and how the student uses English?</td>
<td></td>
<td></td>
</tr>
<tr>
<td>9. Do progress monitoring activities measure progress toward the mastery of English?</td>
<td></td>
<td></td>
</tr>
<tr>
<td>10. Do the goals delineate in which language they will be addressed and who will be responsible for measuring the outcomes?</td>
<td></td>
<td></td>
</tr>
<tr>
<td>11. Is there collaboration between general and special education as well as English as a Second Language and bilingual education if appropriate?</td>
<td></td>
<td></td>
</tr>
<tr>
<td>12. Is an interpreter for the parents and the student present at the IEP meeting?</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

In analyzing school and LEA services to ELs, educators may begin with a review of the educational data available through multiple local, state, and national resources. One such resource is the CRDC website, which provides data collected from schools and LEAs on key education and civil rights issues in our nation's public schools—including student enrollment and educational programs and services—disaggregated by race/ethnicity, sex, EL status, and disability. The website presents this data using various reports and tools. It also provides school- and LEA-level summaries of the CRDC in its “Summary of Selected Facts” charts, and allows users to “drill down” into disaggregated data displays for all of the civil rights data from the 2011–12 school year for a school or LEA. The data can be an indicator of potential equity and opportunity gaps that may exist between ELs (or limited English proficient [LEP] students, as they are referred to here) and non-ELs. The data, however, does not disaggregate between ELs, former ELs, and never-ELs.

**TIPS FOR FINDING CRDC DATA ON ENGLISH LEARNERS WITH DISABILITIES**

To investigate a school's or LEA's EL and non-EL enrollment rates, including race/ethnicity and proportions served under the Individuals with Disabilities Act (IDEA) or Section 504, follow these steps:

2. Click on “School and District Search” on the left-hand navigation menu or on “2009–10 and 2011–12 District or School Reports” in the center of the page.
3. Click on “Find School(s)” or “Find District(s),” depending on your search.
   - To search for a school by name, enter its name into the “School Name” field, and click “School Search.” To focus on a particular state, select the state before clicking “School Search.”
   - To search for a district, click on the “Find District(s)” tab, enter the name into the “District Name” box, and click “District Search.”
   - Users can also search for a school or district by name, address, city, NCES ID, distance from zip code, state, or regional office. Please note that searches are limited to 200 results.
4. Search results will appear below the “Additional Search” options. Click the school or district link from the list of results. Clicking on the name of a school will take you to the “School Summary” page, while clicking on the name of a LEA will take you to the “District Summary” page.
5. The “Summary of Selected Facts” page displays overview information about the chosen school or district. Selected data are displayed in five categories: (1) Characteristics and Membership, (2) Staffing and Finance, (3) Pathways to College and Career Readiness, (4) College and Career Readiness, and (5) Discipline, Restraint/Seclusion, Harassment/Bullying.
6. To look into more detailed EL data, use the links in the light blue box called “Additional Profile Facts Available.” Users can choose to view the data as charts or tables (counts or percentages). OCR has compiled many pertinent EL facts into EL reports. Click on “English learner (EL) report” to review the main report, or on the plus sign to view an expanded menu that includes “Total LEP students” or “LEP students enrolled in LEP programs” sub-reports. Users can chose to view the data as charts or tables (counts or percentages).
   - The main EL report includes data on the following topics:
     - Race/ethnicity of ELs
     - Sex of ELs
     - Proportions of ELs served under IDEA.

You can access Tools and Resources for Addressing English Learners with Disabilities at [http://www2.ed.gov/about/offices/list/oela/english-learner-toolkit/index.html](http://www2.ed.gov/about/offices/list/oela/english-learner-toolkit/index.html)
TOOL #4: HOW TO USE DATA FROM THE OFFICE FOR CIVIL RIGHTS’ CIVIL RIGHTS DATA COLLECTION (CRDC) (CONTINUED)

- Users can find information on the percentage of ELs enrolled in IDEA compared to overall enrollment in the LEA in two locations:
- If the user clicks "English Learner (EL) Report" without expanding the menu, and scrolls down, the user will see pie charts similar to the one below:

![Pie Chart Example](Image)

- If the user expands the "English Learner (EL) Report" tree and then clicks on "Total LEP Students" or "LEP Students Enrolled in LEP Programs" and then scrolls down the page, the user will see bar charts similar to the one below:

![Bar Chart Example](Image)

- The sub-reports compare overall enrollment to the race/ethnicity, sex, and disability status of total LEP students in the school or those enrolled in LEP programs.
- For additional data on ELs with disabilities, click "Students with Disabilities (IDEA)" or "Students with Disabilities (504)" in the blue box on the right-hand side of the screen. At the bottom of the page are data comparing rates of all students with those of ELs in a school or district who are served under IDEA or Section 504 of the Rehabilitation Act of 1973, as amended. Under "EDFacts IDEA" are data by type of disability.

7. Using the "Detailed Data Tables" under "Custom Chart & Detailed Data Tables" in the left-hand navigation menu of the homepage (or in the main menu in the center of the page) allows users to view and compare data across multiple years and schools. Users can access and customize detailed data tables.

You can access Tools and Resources for Addressing English Learners with Disabilities at [http://www2.ed.gov/about/offices/list/oela/english-learner-toolkit/index.html](http://www2.ed.gov/about/offices/list/oela/english-learner-toolkit/index.html).
The EL Tool Kit contains examples of, adaptations of, and links to resources created and maintained by other public and private organizations. This information is provided for the reader’s convenience and is included here to offer examples of the many resources that educators, parents, advocates, administrators, and other interested parties may find helpful and use at their discretion. The U.S. Department of Education does not control or guarantee the accuracy, relevance, timeliness, or completeness of this outside information. Further, the inclusion of links to items does not reflect their importance, nor is it intended to endorse any views expressed, or materials provided.

TOOL #5
SELECTING APPROPRIATE ACCOMMODATIONS FOR STUDENTS WITH DISABILITIES

ELs with disabilities may need accommodations for instruction and assessment. Decisions about whether to use accommodations, and what accommodations to use, should be made on an individual student basis and consider each student’s needs and past and present level of performance. Accommodations should also be written in the IEP.

“DOs” AND “DON’TS” WHEN SELECTING ACCOMMODATIONS

The following table lists common “dos” and “don’ts” for selecting appropriate accommodations for students with disabilities. This table is from the Accommodations Manual: How to Select, Administer, and Evaluate Use of Accommodation for Instruction and Assessment of Students with Disabilities, produced by the Council of Chief State School Officers (CCSSO) State Collaborative on Assessment and Student Standards Assessing Special Education Students. According to this document, “the guidance in the manual pertains to students with disabilities who participate in large-scale assessments and the instruction they receive.” This list, while generic to all students with disabilities, can be adapted for ELs based on SEA and LEA policies and requirements.

<table>
<thead>
<tr>
<th>Do...</th>
<th>Don’t...</th>
</tr>
</thead>
<tbody>
<tr>
<td>Make accommodation decisions based on individualized needs.</td>
<td>Make accommodations decisions based on whatever is easiest to do (e.g., preferential seating).</td>
</tr>
<tr>
<td>Select accommodations that reduce the effect of the disability to access instruction and demonstrate learning.</td>
<td>Select accommodations unrelated to documented student learning needs or are intended to give students an unfair advantage.</td>
</tr>
<tr>
<td>Be certain to document instructional and assessment accommodation(s) on the IEP or 504 plans.</td>
<td>Use an accommodation that has not been documented on the IEP or 504 plans.</td>
</tr>
<tr>
<td>Be familiar with the types of accommodations that can be used as both instructional and assessment accommodations.</td>
<td>Assume that all instructional accommodations are appropriate for use on assessments.</td>
</tr>
<tr>
<td>Be specific about the “Where, When, Who, and How” of providing accommodations.</td>
<td>Simply indicate an accommodation will be provided “as appropriate” or “as necessary.”</td>
</tr>
<tr>
<td>Refer to state accommodations policies and understand implications of selections.</td>
<td>Check every accommodation possible on a checklist simply to be “safe.”</td>
</tr>
<tr>
<td>Evaluate accommodations used by the student.</td>
<td>Assume the same accommodations remain appropriate year after year.</td>
</tr>
<tr>
<td>Get input about accommodations from teachers, parents, and students, and use it to make decisions at IEP team or 504 planning committee meetings.</td>
<td>Make decisions about instructional and assessment accommodations alone.</td>
</tr>
<tr>
<td>Provide accommodations for assessments routinely used for classroom instruction.</td>
<td>Don’t provide an assessment accommodation for the first time on the day of a test.</td>
</tr>
<tr>
<td>Select accommodations based on specific individual needs in each content area.</td>
<td>Assume certain accommodations, such as extra time, are appropriate for every student in every content area.</td>
</tr>
</tbody>
</table>

The U.S. Department of Education does not mandate or prescribe particular standards, curricula, lesson plans, assessments, or other instruments in this tool kit. This tool kit contains examples of, adaptations of, and links to resources created and maintained by other public and private organizations. This information is provided for the reader's convenience and is included here to offer examples of the many resources that educators, parents, advocates, administrators, and other interested parties may find helpful and use at their discretion. The U.S. Department of Education does not control or guarantee the accuracy, relevance, timeliness, or completeness of this outside information. Further, the inclusion of links to resources does not reflect their importance, nor is it intended to endorse any views expressed, or materials provided. All links included here were verified on August 10, 2015. The list of resources will be updated and revised in the future.

This study examines "the role of communication between parents of children with special needs and schools." The study uses a survey as the data collection tool to "determine perceptions of Arab American parents of children with special needs regarding communications between the home and school. Findings indicated that parents born in the United States had more positive perceptions regarding communications with teachers."

This article discusses the challenges involved with (1) content assessments for ELs; and (2) misclassifying ELs as students with learning disabilities. The author claims that “[a]ssessments in English that are constructed and normed for native English speakers may not provide valid inferences about the achievement of English language learners.”

This paper provides context and recommendations related to selecting accommodations for ELs and students with disabilities. Under this framework an accommodation must be feasible to implement; appropriate for the student; sensitive to a student’s background; not alter the assessment; and make the assessment more accessible. The authors offer research to support these conditions.

This resource guide was written as a tool for educators who work with ELs and/or students with disabilities in Canada. Focused mainly on reading and writing in lower grades, it includes practical information and guidance on the identification, assessment, and instruction of ELs with disabilities.
The EL Tool Kit contains examples of, adaptations of, and links to resources created and maintained by other public and private organizations. This report discusses “states’ participation and accommodation policies for [ELs] with disabilities on their English language proficiency (ELP) assessments…. The summary of findings suggests a number of promising practices and issues to be addressed.”

This study reviews and reports state standards, strategies, and supplementary instructional documents for the instruction of ELs with disabilities. The authors state that more research on instructional strategies is needed with students across a range of language and cultural backgrounds and with diverse types of disabilities.

This article examines the weakness of research on minority students’ placement in special education due to many studies defining minority populations too broadly. According to the article, this can be due to a failure to disaggregate such factors as language proficiency or a failure to consider other relevant variables such as social class or program type. The authors reviewed placement patterns of ELs, an identified understudied group, in California urban districts. They found “disproportionate representation patterns relating to grade level, language proficiency status, disability category, type of special education program, and type of language support programs.” The authors discuss implications for further research and practice.

This report reviews research and policies about ELs with learning disabilities. The report is based on the premise that “two factors have been identified that lead to inconsistent identification of students who may have learning disabilities: a lack of understanding among teachers about why English learner students are not making adequate progress, and poorly designed and implemented referral processes.” There are two report components: (1) research on literature consisting of 52 articles or reports discussing the topic of EL and learning disability identification, and (2) an analysis of EL procedures from the 20 states with the largest population of ELs.

This checklist is included as part of a National Dissemination Center for Children with Disabilities (NICHCY) training tool on IDEA. It presents framing questions to be considered when writing an IEP for an EL, on topics that include assessments, home languages, communication methods, and instructional goals.

You can access Tools and Resources for Addressing English Learners with Disabilities at [http://www2.ed.gov/about/offices/list/oeifa/english-learner-toolkit/index.html](http://www2.ed.gov/about/offices/list/oeifa/english-learner-toolkit/index.html)

In this webinar, Collier outlines the current legislative context and cultural assumptions related to ELs with disabilities. She also offers seven pillars of appropriately serving ELs with disabilities in a way that distinguishes language difference from learning difference: (1) providing adequate and appropriate staff and resources to support ELs with disabilities and their families; (2) implementing strategies to support student resilience; (3) differentiating instruction from intervention; (4) monitoring classroom instruction and intervention; (5) referring students for special education services when appropriate; (6) ensuring an IEP is cross-cultural and responds to a student’s learning and language needs; and (7) promoting staff collaboration and multi-dimensional school support systems.

“The guidance in the manual pertains to students with disabilities who participate in large-scale assessments and the instruction they receive.” This manual, while generic to all students with disabilities, can be adapted for ELs based on SEA and LEA policies and requirements. It includes recommended steps to select, administer, and evaluate the effectiveness of accommodations for students with disabilities.

This article describes the elements of an effective professional development program that was used successfully with ELs with disabilities (Echevarria & Short, 2009). The case study shows that research-based practices coupled with effective professional development ensure high levels of implementation.

This white paper discusses English language proficiency assessments (ELPAs) and how to make them more accessible for ELs with disabilities. The paper discusses the accessibility measures currently available for ELs with disabilities; the challenges associated with ELPAs for ELs with disabilities; recommendations for practice; and research considerations. This is the second in a series of ETS papers related to improving ELPAs for ELs.

This book is written for special education professionals who work with ELs. It provides guidance on the unique needs of ELs with disabilities and how to design appropriate interventions. It includes professional development activities and discussion questions as well as graphic organizers.

For this publication, which is dedicated to policies related to ELs with disabilities, researchers interviewed SEA staff members from seven states that were selected because they had a large or rapidly growing EL population. The states included were Alaska, Arkansas, California, Florida, Kansas, New Mexico, and Texas. SEAs can review the policies and recommendations included in this publication to see if their own policies for ELs with disabilities align.

This study was completed to examine "the special education referral and decision-making process for English language learners (ELLs), with a focus on Child Study Team (CST) meetings and placement conferences/multidisciplinary team meetings". Observation of CST meetings revealed that in practice, "only cursory attention was given to pre-referral strategies" and that "most students were pushed towards testing."

This report provides an overview of the testing accommodations available for students with disabilities for content assessments according to state policies. It also includes an analysis of how those policies have changed over time since 1992. The accommodations considered in this report include human scribe, speech to text, audio transcription, word prediction, grammar checker, spell checker, and calculator.

This report "examines the concepts, potential benefits, practical issues, and unanswered questions associated with responsiveness to intervention (RTI) and learning disabilities (LD). A brief overview of the approach is provided, including attributes, characteristics, and promising features, as well as issues, concerns, unanswered questions, and research needs."

This paper describes the need for general education and special education teachers to collaborate to meet the needs of ELs with learning disabilities; discusses research-based approaches for teaching these students; and suggests effective and appropriate methods and strategies for use in least restrictive environments.

“This resource book has two primary focus areas: (1) understanding the requirements for EL assessment, identification, and program requirements, and (2) how these processes are expanded to incorporate special education procedures when an EL is suspected of having a disability. As such, it is intended as a tool to assist general and special education administrators, teachers, special education staff, and English language support staff to better understand the needs of K-12 ELs with disabilities.”

This study examines practices and challenges in the processes applied in three New York State districts in identifying learning disabilities among EL students. Analysis suggests five interrelated elements that appear to be important for avoiding misidentification of learning disabilities among students who are ELs: (1) adequate professional knowledge, (2) effective instructional practices, (3) effective and valid assessment and interventions, (4) interdepartmental collaborative structures, and (5) clear policy guidelines.

This brief outlines some of the challenges associated with identifying young ELs with disabilities and offers research-based recommendations for policy and practice; considerations for selecting assessment tools; recommendations for training practices; contact information for national experts in the field; and resources on assessing ELs.

This article examines identification of and remediation for ELs with possible LDs. Identification methods include assessments and information obtained from the parents about the prior history of the child and family. The article concludes that further research on identifying and teaching is needed for ELs with LDs.

“This study explores the disproportionality in the identification and placement of culturally and linguistically diverse...ELs in special education.” Descriptive analysis and regression analyses results indicate that ELs “are increasingly likely to be identified as having learning disabilities or mental retardation, and less likely to be served in either the least or most restrictive educational environment relative to their white peers.... The study presents implications for further research and practice.”

This report identifies five core principles of inclusive and valid assessment for ELs with disabilities. A brief rationale and specific guidelines that reflect each principle are also provided.

This article defines accommodations and identifies four types: (1) presentation, (2) response, (3) setting, and (4) timing and scheduling. The authors state that accommodations should be tailored to the child’s specific needs and should be regularly monitored and evaluated.

This brief focuses on the rate and type of participation of ELs with disabilities in state English language proficiency assessments. The topics included in the brief are: “(a) state policies on participation, (b) use and reporting of data on participation in ELP assessments, (c) experts’ recommendations about assessment participation, and (d) the understanding of practitioners about the participation of ELLs with disabilities in ELP assessments.” The brief also includes recommendations for practice.

This brief reviews how decisions are made about what assessments and what accommodations are appropriate for ELs with disabilities. The topics addressed include: ”(a) required assessment decision-making processes, (b) experts’ recommendations about assessment decision making for ELLs [English language learners] with disabilities, (c) resources available to guide assessment decision making, (d) standards-based IEPs, and (e) recommended participants on the decision-making team.” The brief also includes policy recommendations.
The EL Tool Kit contains examples of, adaptations of, and links to resources created and maintained by other public and private organizations. This information is provided for the reader’s convenience and is included here to offer examples of the many resources that educators, parents, advocates, administrators, and other interested parties may find helpful and use at their discretion. The U.S. Department of Education does not control or guarantee the accuracy, relevance, timeliness, or completeness of this outside information. Further, the inclusion of links to items does not reflect their importance, nor is it intended to endorse any views expressed, or materials provided.

The Civil Rights Data Collection (CRDC) is a biennial (i.e., every other school year) survey required by the U.S. Department of Education’s Office for Civil Rights (OCR). Since 1968, the CRDC has collected data on key education and civil rights issues in our nation’s public schools for use by OCR in its enforcement and monitoring efforts regarding equal educational opportunity. The CRDC is also a tool for other department offices and federal agencies, policymakers and researchers, educators and school officials, and the public to analyze student equity and opportunity.

This document provides detailed and concrete information to educators on the standards set in Title VI of the Civil Rights Act of 1964, including information on the requirements for educational resources; how OCR investigates resource disparities; and what SEAs, LEAs, and schools can do to meet their obligations to all students. Under Title VI, SEAs, LEAs, and schools must not intentionally treat students differently based on race, color, or national origin in providing educational resources. In addition, they must not implement policies or practices that disproportionately affect students of a particular race, color, or national origin, absent a substantial justification. The law does not require that all students receive exactly the same resources to have an equal chance to learn and achieve. It does, however, require that all students have equal access to comparable resources in light of their educational needs.

This document provides guidance on the inclusion of SEAs, LEAs, and all public schools in meeting their legal obligations to ensure that ELs can participate meaningfully and equally in educational programs and services. This guidance provides an outline of the legal obligations of SEAs and LEAs to ELs under the civil rights laws. Additionally, the guidance discusses compliance issues that frequently arise in OCR and DOJ investigations under Title VI of the Civil Rights Act of 1964 and the Equal Educational Opportunities Act, and offers approaches that SEAs and LEAs may use to meet their federal obligations to ELs. A discussion of how SEAs and LEAs can implement their Title III grants and subgrants in a manner consistent with these civil rights obligations is included. Finally, the guidance discusses the federal obligation to ensure that limited English proficient parents and guardians have meaningful access to SEA-, LEA-, and school-related information.

In March 2015, OELA hosted a series of panel presentations on assessing the ELP of ELs with disabilities. Experts in the field provided background information, context, and current data related to distinguishing language difference from disability; using valid and reliable assessments for ELs with disabilities; and assessing ELs with significant cognitive disabilities. This document summarizes all the papers.

This document provides guidance on the inclusion of ELs with disabilities in ELP assessments under Titles I and III of the Elementary and Secondary Education Act of 1965, as amended. These are assessments designed to measure the progress of ELs in attaining English language proficiency. (An addendum was released in July, 2015.)

You can access Tools and Resources for Addressing English Learners with Disabilities at http://www2.ed.gov/about/offices/list/oela/english-learner-toolkit/index.html
The EL Tool Kit contains examples of, adaptations of, and links to resources created and maintained by other public and private organizations. This annual report provides various data on assessments, child counts, and educational environments for IDEA Parts B and C. Part B of IDEA provides funds to states to assist them in providing FAPE to children with disabilities, ages three through 21, who are in need of special education and related services.

This study provides findings on the number of ELs, their backgrounds, and the “instructional services they received in grades K–12 in public schools in the United States for SY 2001-02.” This study includes a special focus on ELs with disabilities who are identified as being in need of special education services (SpEd-LEP), national estimates on the number of SpEd-LEP students, identified disability categories, nature of instructional services they receive, and “information on policy and practice related to ELs participation in standards and assessments.”

This paper reviews challenges in educating children “with and without disabilities from culturally and linguistically diverse (CLD) backgrounds. The challenges discussed include (1) biased assessment that results in mis- or over representing CLD students in special education, (2) difficulty distinguishing between disability and differences, and (3) lack of competent bilingual special educators.” The authors recommend the use of ”the response to intervention (RTI) model in identifying and instructing CLD children with and without disabilities.” Future research should (1) “examine how collaborative service delivery models contribute to referrals of CLD children” with and without disabilities and to their instruction, and (2) “focus on how to expand teachers’ knowledge about both the sociocultural and learning contexts to aid in producing positive outcomes for CLD children both with and without disabilities.”

To access these and other relevant resources, and for additional information about ELs, please visit http://www.ncela.ed.gov/.

You can access Tools and Resources for Addressing English Learners with Disabilities at http://www2.ed.gov/about/offices/list/oeila/english-learner-toolkit/index.html.
